

BUILD BLOCK BRIEF · FALL 2026-27

Business Core · Market-Entry Dossier CLIENT LANE

Planning brief session 4 · build from session 8 · 95 students · 20 teams · courses: GBBA325, GBBC432, GBIB436, GEBF326, GEMM431, GHCC434, GHPH433, GHAA435, GHPP431

What your team is building

A real Karachi firm from Dr Rab Nawaz's client list, a real foreign market, one dossier the firm can use. Two target markets compared, one recommended; trade data, costing, mode of entry, communication plan, ethics and consumer-psychology chapters; pitch deck.

ONE PROJECT, SEVERAL GRADEBOOKS

You submit **one** piece of work, and each course that marks it looks at a different dimension, out of 20. **At most eight courses mark one team file.** A course you take that falls outside those eight sets you a **lens note** instead — an individual piece on the same project from that course's angle, 3,000 words, same rubric, same 20 marks. No student carries more than two: from a third, that course marks your viva out of 30 instead.

YOUR MARKS FROM THIS PROJECT

30 the project — a team mark of 20 from each course that marks your file, plus your own viva of 10, held in class in session 14

30 the mid-term

40 the final

The three quizzes are practice and carry no marks.

This replaces coursework, not classes.

What each course marks

CODE	COURSE	WHAT THIS COURSE MARKS — 20 MARKS
GBBA325	Big Data Analytics Asif Khalid	This course marks the data work: where the market data came from and whether it can bear the weight put on it, the cleaning and its record, the analysis and its assumptions, the clarity of the dashboard, and the honesty with which uncertainty is stated. 20 marks, team.
GBBC432	Business Communication Dr Mariam Minhas	This course marks the document and the delivery: the structure and clarity of the dossier, the correctness of its English, the design of the investor pitch, the handling of questions on the day, and the professionalism of the correspondence with the client. 20 marks, team.
GBIB436	International Business Dr. Emad ul Karim	This course marks the entry-mode decision and its justification: the country and risk assessment, the mode comparison, the cultural and regulatory read, and the quality of the recommendation defended in the session-14 review. 20 marks, team.

CODE	COURSE	WHAT THIS COURSE MARKS — 20 MARKS
GEBF326	Introduction to Business Finance Dr Rakesh Parkash	This course marks the money: the costing of the entry, the funding requirement and where it comes from, the break-even and payback calculation, the discounted cash-flow case, and whether the numbers in the dossier survive being checked. 20 marks, team.
GEMM431	Microeconomics & Macro Economics Dr. Arifa Saeed	This course marks the macro read: the choice of indicators, the accuracy with which published data is used, the demand estimate and the reasoning behind it, the elasticity and pricing argument, and the policy risks named for the target market. 20 marks, team.
GHCC434	Civics & Community Engagement Husna Allam	This course marks the stakeholder and community assessment in the dossier: who is affected at home and in the target market, what consultation was actually carried out and with whom, the obligations identified, and the social-licence risks named. 20 marks, team.
GHPH433	Philosophy & Critical Thinking Muhammad Umer	This course marks the reasoning in the dossier: the assumptions the team left unstated, the weakest inference in the entry case, the quality of the counter-argument put against it, and the honesty of the ethical exposure identified. 20 marks, team.
GHAA435	Applied Area of Psychology Aisha Ismail	This course marks the applied-psychology angle of the dossier: the people side of the market entry — consumer, workforce or wellbeing — the assessment approach chosen and justified, and whether the recommendation follows from it. 20 marks, team.
GHPH431	Positive Psychology Aisha Ismail	This course marks the wellbeing chapter of the dossier: which positive-psychology constructs bear on the workforce or customers in the target market, the measure chosen, and whether the claim is supported by evidence. 20 marks, team.

What to hand in

- **GBBA325 Big Data Analytics** — By session 12 a hosted dashboard for the target market — demand, price and competitor data, built in Python or a no-code tool with AI assistance and published at a live URL — with the cleaned data set and the transformation log.

BUILD BLOCK BRIEF · FALL 2026-27

Business Core · Market-Entry Dossier CLIENT LANE

continued

- **GBBC432 Business Communication** — By session 12 the finished dossier formatted to a house standard, and a hosted one-page pitch site for the client — written and laid out with AI assistance and published at a live URL — together with the pitch deck.
- **GBIB436 International Business** — By session 12 a hosted market-entry brief for the client — country screen, risk register, mode comparison and the recommendation, built with AI assistance and published at a live URL — plus the entry chapter of the dossier.
- **GEBF326 Introduction to Business Finance** — By session 12 a hosted costing and cash-flow model for the entry — built with AI assistance and published as a live dashboard the client can open — together with the two-page financial case inside the dossier.
- **GEMM431 Microeconomics & Macro Economics** — By session 12 a four-page macro brief on the target market with a hosted data page — indicators, charts and sources, assembled with AI assistance and published at a live URL — feeding the demand estimate inside the dossier.
- **GHCC434 Civics & Community Engagement** — By session 12 the stakeholder and community assessment inside the dossier, plus a short hosted client brief page built with AI tools, the consultation notes with consent records, and AI declaration.
- **GHPH433 Philosophy & Critical Thinking** — By session 12 an assumption audit and written critique of the dossier — unstated premises, the weakest inference, the strongest objection, the ethical exposure — published on the team's hosted dossier page with AI declaration.
- **GHAA435 Applied Area of Psychology** — By session 12 the team files an applied-psychology chapter of four pages inside the dossier, with the assessment approach, its evidence and a recommendation.
- **GHPP431 Positive Psychology** — By session 12 the team files a wellbeing chapter of three pages inside the dossier, with a named construct, a measure, and sourced evidence.

How big the file is

The written file is **3,000 words for every member**, plus or minus ten per cent — 15,000 words for a team of five, 12,000 for four, 9,000 for three — plus the artefacts: the evidence or data log with its instrument, interview notes and consent log, any program with its tests, the pitch deck, the AI declaration and the draft-to-final revision log. In the venture and client lanes the live thing itself is the largest artefact. Each member owns one section of 3,000 words with their name on it, one artefact they built, and one part they can defend alone at viva. A lens note is 3,000 words on the same project. The full format is in "The Build Block File — required format" in the kit.

CLIENT LANE

continued

Dates

Session 4	28 Sep	Planning brief issued — twenty minutes of class: the brief, the Ideas Book and the format sheet. Teams locked since session 3. Choose the project, design the instrument or find the client, split the sections.
Guest session	Session 4, 5 or 6	A practitioner from outside the university speaks to your school, on whichever of those three sessions the speaker can make. Attendance is compulsory. Each student writes one page on it for their own file; it is not marked.
Session 7	19 Oct	One-page plan uploaded to the portal: the question, the instrument or the client charter, who owns what. Not marked — it is the gate. This week the convener merges the marking courses' requirements into the file's sections, so the team writes one document and not eight. Clients matched to teams.
Session 8	2 Nov	Build starts. Rubric issued, roles confirmed, team charter uploaded. Build-with-AI workshop for venture and client teams.
Session 9	9 Nov	Scope agreed with the convener. Client or subject confirmed. Your school arranges its industrial visit for some point between now and session 12.
Session 11	23 Nov	Draft review, inside a normal class: each course teacher sees the teams in their own section for about ten minutes each — show what exists, not what you plan. The convener samples three files per block.
Session 12	30 Nov	The artefact goes live or reaches its first complete state.
Session 13	7 Dec	Final file uploaded with its AI declaration. Venture teams evidence the first paying customer. Five of the twenty come off for each week the file is late, in every course marking it, and nothing is accepted after the Karachi Review.
Session 14	14-19 Dec	Vivas in class: each course holds its own, team by team, in its session-14 class — about three minutes per student, on your own part as that course sees it.
The Karachi Review	Tue 15 Dec	Your team exhibits at its own table, across the campus, all day. The day opens with a thirty-minute handover of studies to the public bodies who asked for them; press and industry attend. Ten panels — a teacher and an alumnus each — circulate the exhibition and score you at your table, about eight minutes a team. Not marked separately; the panel sheet goes to every course marking the file.
Weekend	—	Weekend cohorts hold all of the above in their Saturday and Sunday slots; the Karachi Review runs on a weekend afternoon.

Rules for this lane

BUILD BLOCK BRIEF · FALL 2026-27

Business Core · Market-Entry Dossier CLIENT LANE

continued

What counts as done

A working deliverable in the client's hands, hosted where it needs to be hosted, with the files and accounts handed over and the client's written comment on record.

The client relationship

You get two meetings — one to take the brief, one to show progress — plus a short written comment at the end. Ask for no more. The client owes you nothing and pays nothing, and you may never request a fee.

Confidentiality

Whatever the client marks confidential stays inside the team and the supervisor. Never accept customer records, financial account details or personal data about identifiable people, and never put any of it into an AI tool.

If the client goes quiet

Tell your convener in the same week. Every client-lane block has an internal Greenwich brief as a fallback — the GX record, the alumni directory, Journey 40 and departmental systems all need building.

Marks

You are marked on the work, not on the client's mood. A difficult client, honestly handled and documented, is not a penalty.

Using AI

You are expected to use Claude and similar tools — to research, to build, to draft, to model numbers. Three rules. Check everything a tool gives you before you use it, and record the check. Declare what you used in the AI declaration bound into the file, as the HEC *Framework on the Use of Generative AI Tools* (2026) requires. Be able to explain, at the viva, everything your team built. **Work you cannot explain is not credited to you.** Undeclared use, or use to fabricate data, references or results, is academic misconduct. Never put real client, patient or examinee data, or anything identifying a real person, into a tool.
