

BUILD BLOCK BRIEF · FALL 2026-27

Business Foundations Desk CLIENT LANE

Planning brief session 4 · build from session 8 · 40 students · 8 teams · courses: GBBL312, GBCE316, GEFA314, GHEC315, GBBE311, GBGM100, GHGE300, GHMS314

What your team is building

First-year business students build a compliance-and-accounts package for a real micro-business — law, accounting, computing, written English. From Fall 2026 it is the first-year block: new teams work for a client inside Greenwich University on Tier 1 ethics, with a Computing strand for first-year computing students.

ONE PROJECT, SEVERAL GRADEBOOKS

You submit **one** piece of work, and each course that marks it looks at a different dimension, out of 20. **At most eight courses mark one team file.** A course you take that falls outside those eight sets you a **lens note** instead — an individual piece on the same project from that course's angle, 3,000 words, same rubric, same 20 marks. No student carries more than two: from a third, that course marks your viva out of 30 instead.

YOUR MARKS FROM THIS PROJECT

30 the project — a team mark of 20 from each course that marks your file, plus your own viva of 10, held in class in session 14
30 the mid-term
40 the final
The three quizzes are practice and carry no marks.

This replaces coursework, not classes.

What each course marks

CODE	COURSE	WHAT THIS COURSE MARKS — 20 MARKS
GBBL312	Business Law Anusha Minhas Bandeali	This course marks the rules the team's work has to live inside: the university regulations, contracts, notices or consumer and data rules that apply to the client's problem, stated accurately and cited, and whether the team's recommendation would actually be lawful for the client to adopt. 20 marks, team.
GBCE316	Computing Essentials Syed Faraz Afsar	This course marks the working files: one tidy shared folder, a spreadsheet with every formula visible, a clean data table the client can reopen, and a short how-to that lets someone outside the team use what was built. 20 marks, team.
GEFA314	Financial Accounting Maria Razzaque	This course marks the money: the costs and prices the team gathered, how they were recorded and totalled, a simple statement of what the client spends or could save, and whether the figures reconcile. 20 marks, team.

Business Foundations Desk CLIENT LANE

continued

CODE	COURSE	WHAT THIS COURSE MARKS — 20 MARKS
GHEC315	English Composition Kanza Ali	This course marks the writing: the report to the client, its structure and argument, whether each claim is supported, and whether a reader outside the team would understand it on first reading. 20 marks, team.
GBBE311	Business Ethics Asim M. Shaikh	This course marks the fairness of the work: how the team gathered its evidence without using anyone's personal data, whether the recommendation is fair to the students and staff it affects, and a short ethical risk note with one mitigation per risk. 20 marks, team.
GBGM100	Mathematics-I Mohammad Tauqeer Khan	This course marks the calculation: the quantities the team measured or counted, the formulas used to work from them, the arithmetic shown step by step, and whether the answer is of the right size. 20 marks, team.
GHGE300	General English Mehwish Umair	This course marks the plain-English version: the notice, poster, email or one-page leaflet the team writes for the people the client serves, judged on clarity, grammar and whether it says one thing well. 20 marks, team.
GHMS314	Morphology & Syntax Hafiz Imran Nawaz	This course marks the language of the client's own texts: a close analysis of the forms, notices or messages the client already uses, what makes them hard to read, and a rewritten version justified sentence by sentence. 20 marks, team.

What to hand in

- **GBBL312 Business Law** — By Session 12 the team files a two-page legal note for the client: the rules that apply, where they come from, and what the recommendation must respect.
- **GBCE316 Computing Essentials** — By Session 12 the team hands the client the folder, the workbook and the one-page how-to, all opening on a university computer.
- **GEFA314 Financial Accounting** — By Session 12 the team files the cost schedule and a one-page financial summary for the client, every figure traceable to a receipt, a price list or a count.
- **GHEC315 English Composition** — By Session 12 the team hands the client a report of no more than ten pages with a one-page summary at the front.

BUILD BLOCK BRIEF · FALL 2026-27

Business Foundations Desk **CLIENT LANE**

continued

- **GBBE311 Business Ethics** — By Session 12 the team files the ethics screening sheet, countersigned, and a one-page ethical risk note inside the Folio.
- **GBGM100 Mathematics-I** — By Session 12 the team files a calculations annex: every number in the report, and the working that produced it.
- **GHGE300 General English** — By Session 12 the team hands the client one short piece written for students or staff, ready to be put up or sent.
- **GHMS314 Morphology & Syntax** — By Session 12 the team files the analysis and the rewritten text side by side.

How big the file is

The written file is **3,000 words for every member**, plus or minus ten per cent — 15,000 words for a team of five, 12,000 for four, 9,000 for three — plus the artefacts: the evidence or data log with its instrument, interview notes and consent log, any program with its tests, the pitch deck, the AI declaration and the draft-to-final revision log. In the venture and client lanes the live thing itself is the largest artefact. Each member owns one section of 3,000 words with their name on it, one artefact they built, and one part they can defend alone at viva. A lens note is 3,000 words on the same project. The full format is in "The Build Block File — required format" in the kit.

Business Foundations Desk **CLIENT LANE**

continued

Dates

Session 4	28 Sep	Planning brief issued — twenty minutes of class: the brief, the Ideas Book and the format sheet. Teams locked since session 3. Choose the project, design the instrument or find the client, split the sections.
Guest session	Session 4, 5 or 6	A practitioner from outside the university speaks to your school, on whichever of those three sessions the speaker can make. Attendance is compulsory. Each student writes one page on it for their own file; it is not marked.
Session 7	19 Oct	One-page plan uploaded to the portal: the question, the instrument or the client charter, who owns what. Not marked — it is the gate. This week the convener merges the marking courses' requirements into the file's sections, so the team writes one document and not eight. Clients matched to teams.
Session 8	2 Nov	Build starts. Rubric issued, roles confirmed, team charter uploaded. Build-with-AI workshop for venture and client teams.
Session 9	9 Nov	Scope agreed with the convener. Client or subject confirmed. Your school arranges its industrial visit for some point between now and session 12.
Session 11	23 Nov	Draft review, inside a normal class: each course teacher sees the teams in their own section for about ten minutes each — show what exists, not what you plan. The convener samples three files per block.
Session 12	30 Nov	The artefact goes live or reaches its first complete state.
Session 13	7 Dec	Final file uploaded with its AI declaration. Venture teams evidence the first paying customer. Five of the twenty come off for each week the file is late, in every course marking it, and nothing is accepted after the Karachi Review.
Session 14	14-19 Dec	Vivas in class: each course holds its own, team by team, in its session-14 class — about three minutes per student, on your own part as that course sees it.
The Karachi Review	Tue 15 Dec	Your team exhibits at its own table, across the campus, all day. The day opens with a thirty-minute handover of studies to the public bodies who asked for them; press and industry attend. Ten panels — a teacher and an alumnus each — circulate the exhibition and score you at your table, about eight minutes a team. Not marked separately; the panel sheet goes to every course marking the file.
Weekend	—	Weekend cohorts hold all of the above in their Saturday and Sunday slots; the Karachi Review runs on a weekend afternoon.

Rules for this lane

BUILD BLOCK BRIEF · FALL 2026-27

Business Foundations Desk **CLIENT LANE**

continued

What counts as done

A working deliverable in the client's hands, hosted where it needs to be hosted, with the files and accounts handed over and the client's written comment on record.

The client relationship

You get two meetings — one to take the brief, one to show progress — plus a short written comment at the end. Ask for no more. The client owes you nothing and pays nothing, and you may never request a fee.

Confidentiality

Whatever the client marks confidential stays inside the team and the supervisor. Never accept customer records, financial account details or personal data about identifiable people, and never put any of it into an AI tool.

If the client goes quiet

Tell your convener in the same week. Every client-lane block has an internal Greenwich brief as a fallback — the GX record, the alumni directory, Journey 40 and departmental systems all need building.

Marks

You are marked on the work, not on the client's mood. A difficult client, honestly handled and documented, is not a penalty.

Using AI

You are expected to use Claude and similar tools — to research, to build, to draft, to model numbers. Three rules. Check everything a tool gives you before you use it, and record the check. Declare what you used in the AI declaration bound into the file, as the HEC *Framework on the Use of Generative AI Tools* (2026) requires. Be able to explain, at the viva, everything your team built. **Work you cannot explain is not credited to you.** Undeclared use, or use to fabricate data, references or results, is academic misconduct. Never put real client, patient or examinee data, or anything identifying a real person, into a tool.
