

BUILD BLOCK BRIEF · FALL 2026-27

Campaign Studio **CLIENT LANE**

Planning brief session 4 · build from session 8 · 45 students · 10 teams · courses: GMCL436, GMCW433, GMFD326, GMD435, GMRB436, GMSB444, GMSM432

What your team is building

A full public-interest campaign for a real client — research, creative, copy, storyboard, photography and lighting, social rollout, digital PR — delivered and measured over four weeks; the results and creative go to the authority the campaign serves.

ONE PROJECT, SEVERAL GRADEBOOKS

You submit **one** piece of work, and each course that marks it looks at a different dimension, out of 20. **At most eight courses mark one team file.** A course you take that falls outside those eight sets you a **lens note** instead — an individual piece on the same project from that course's angle, 3,000 words, same rubric, same 20 marks. No student carries more than two: from a third, that course marks your viva out of 30 instead.

YOUR MARKS FROM THIS PROJECT

30 the project — a team mark of 20 from each course that marks your file, plus your own viva of 10, held in class in session 14

30 the mid-term

40 the final

The three quizzes are practice and carry no marks.

This replaces coursework, not classes.

What each course marks

CODE	COURSE	WHAT THIS COURSE MARKS — 20 MARKS
GMCL436	Camera & Lighting Techniques Syed Ali Kazmi	This course marks the shoot: whether the storyboard was covered, whether exposure, focus and white balance hold across takes, whether the lighting achieves the stated intention, and whether the footage and stills are usable in the edit and the grade. 20 marks, team.
GMCW433	Copywriting Dr Naazir Mehmood	This course marks the words: the single-minded proposition, the headlines, the body copy and the calls to action across every channel, the fit between register and reader, and whether every claim made is honest and can be sourced. 20 marks, team.
GMFD326	Fundamentals of Design Fariha Jaffar	This course marks the composition: whether hierarchy, balance, contrast and colour hold across every piece in the campaign, whether the grid is kept, and whether the team can explain each decision in design language rather than taste. 20 marks, team.

CODE	COURSE	WHAT THIS COURSE MARKS — 20 MARKS
GMGD435	Graphics Design Dr Sabir Ahmed	This course marks the design: the quality of the identity system, the typographic and colour decisions, the vector craft, the fitness of each asset for its channel, and whether the print and screen files hand over cleanly. 20 marks, team.
GMRB436	Digital Public Relations & Blogging Monazza Fatima	This course marks the earned attention: the strength of the story and its angles, the quality of the release, the pitch and the published content, the handling of the media relationship, and the honesty of the coverage report. 20 marks, team.
GMSB444	Storyboarding & Idea Development Rashid Suri	This course marks the thinking and the frames: the range of concepts generated and how the winner was chosen, the clarity of the boards, the shot grammar and continuity, and whether a crew could actually shoot the sequence from them. 20 marks, team.
GMSM432	Social Media Studies & Optimization Danish Mehmood	This course marks the channel work: the audience and objective definition, the posting calendar and format choices, the community management through the live period, and the honesty with which the results are read and reported back. 20 marks, team.

What to hand in

- **GMCL436 Camera & Lighting Techniques** — By session 12 the shot campaign sequence and the stills set are delivered to the cluster's hosted campaign microsite, built with AI tools, alongside the shot list, lighting diagrams and camera reports. The AI declaration is filed with them.
- **GMCW433 Copywriting** — By session 12 the campaign copy set is live on the hosted campaign page built with AI tools — headlines, long and short body copy, captions, email and script — each line matched to a channel and filed with AI declaration.
- **GMFD326 Fundamentals of Design** — By session 12 the team's compositional sheet is published with the campaign pack — grid, type scale, colour rules and annotated layouts for each piece, built and hosted with AI tools and filed with AI declaration.
- **GMGD435 Graphics Design** — By session 12 the campaign asset pack is live on a hosted page built with AI tools — logo files, key visuals sized for print and for each platform, and a one-page brand guide — filed with AI declaration.

BUILD BLOCK BRIEF · FALL 2026-27

Campaign Studio

CLIENT LANE

continued

- **GMRB436 Digital Public Relations & Blogging** — By session 12 the client's blog and vlog content is live on a hosted publishing page built with AI tools, releases are issued and pitches sent, with the media list, the coverage log and AI declaration filed.
- **GMSB444 Storyboarding & Idea Development** — By session 12 the finished presentation boards, the shot list and a timed animatic are published on the hosted campaign page built with AI tools, and filed with AI declaration.
- **GMSM432 Social Media Studies & Optimization** — By session 12 the client's channels are live and running the campaign calendar — optimised profiles, published posts across platforms, tracking configured, and a hosted results dashboard built with AI tools, filed with AI declaration.

How big the file is

The written file is **3,000 words for every member**, plus or minus ten per cent — 15,000 words for a team of five, 12,000 for four, 9,000 for three — plus the artefacts: the evidence or data log with its instrument, interview notes and consent log, any program with its tests, the pitch deck, the AI declaration and the draft-to-final revision log. In the venture and client lanes the live thing itself is the largest artefact. Each member owns one section of 3,000 words with their name on it, one artefact they built, and one part they can defend alone at viva. A lens note is 3,000 words on the same project. The full format is in "The Build Block File — required format" in the kit.

BUILD BLOCK BRIEF · FALL 2026-27

Campaign Studio **CLIENT LANE**

continued

Dates

Session 4	28 Sep	Planning brief issued — twenty minutes of class: the brief, the Ideas Book and the format sheet. Teams locked since session 3. Choose the project, design the instrument or find the client, split the sections.
Guest session	Session 4, 5 or 6	A practitioner from outside the university speaks to your school, on whichever of those three sessions the speaker can make. Attendance is compulsory. Each student writes one page on it for their own file; it is not marked.
Session 7	19 Oct	One-page plan uploaded to the portal: the question, the instrument or the client charter, who owns what. Not marked — it is the gate. This week the convener merges the marking courses' requirements into the file's sections, so the team writes one document and not eight. Clients matched to teams.
Session 8	2 Nov	Build starts. Rubric issued, roles confirmed, team charter uploaded. Build-with-AI workshop for venture and client teams.
Session 9	9 Nov	Scope agreed with the convener. Client or subject confirmed. Your school arranges its industrial visit for some point between now and session 12.
Session 11	23 Nov	Draft review, inside a normal class: each course teacher sees the teams in their own section for about ten minutes each — show what exists, not what you plan. The convener samples three files per block.
Session 12	30 Nov	The artefact goes live or reaches its first complete state.
Session 13	7 Dec	Final file uploaded with its AI declaration. Venture teams evidence the first paying customer. Five of the twenty come off for each week the file is late, in every course marking it, and nothing is accepted after the Karachi Review.
Session 14	14-19 Dec	Vivas in class: each course holds its own, team by team, in its session-14 class — about three minutes per student, on your own part as that course sees it.
The Karachi Review	Tue 15 Dec	Your team exhibits at its own table, across the campus, all day. The day opens with a thirty-minute handover of studies to the public bodies who asked for them; press and industry attend. Ten panels — a teacher and an alumnus each — circulate the exhibition and score you at your table, about eight minutes a team. Not marked separately; the panel sheet goes to every course marking the file.
Weekend	—	Weekend cohorts hold all of the above in their Saturday and Sunday slots; the Karachi Review runs on a weekend afternoon.

CLIENT LANE

continued

What counts as done

A working deliverable in the client's hands, hosted where it needs to be hosted, with the files and accounts handed over and the client's written comment on record.

The client relationship

You get two meetings — one to take the brief, one to show progress — plus a short written comment at the end. Ask for no more. The client owes you nothing and pays nothing, and you may never request a fee.

Confidentiality

Whatever the client marks confidential stays inside the team and the supervisor. Never accept customer records, financial account details or personal data about identifiable people, and never put any of it into an AI tool.

If the client goes quiet

Tell your convener in the same week. Every client-lane block has an internal Greenwich brief as a fallback — the GX record, the alumni directory, Journey 40 and departmental systems all need building.

Marks

You are marked on the work, not on the client's mood. A difficult client, honestly handled and documented, is not a penalty.

Using AI

You are expected to use Claude and similar tools — to research, to build, to draft, to model numbers. Three rules. Check everything a tool gives you before you use it, and record the check. Declare what you used in the AI declaration bound into the file, as the HEC *Framework on the Use of Generative AI Tools* (2026) requires. Be able to explain, at the viva, everything your team built. **Work you cannot explain is not credited to you.** Undeclared use, or use to fabricate data, references or results, is academic misconduct. Never put real client, patient or examinee data, or anything identifying a real person, into a tool.
