

BUILD BLOCK BRIEF · FALL 2026-27

Digital Reach Lab **CLIENT LANE**

Planning brief session 4 · build from session 8 · 18 students · 4 teams · courses: GMBC445, GMCL441, GMDC552, GMMG553, GMSE555

What your team is building

A full search-and-social digital push for a real client, with motion and compositing assets, SEO, paid social, and a cyber-law compliance review; the measured results go to the client and the authority.

ONE PROJECT, SEVERAL GRADEBOOKS

You submit **one** piece of work, and each course that marks it looks at a different dimension, out of 20. **At most eight courses mark one team file.** A course you take that falls outside those eight sets you a **lens note** instead — an individual piece on the same project from that course's angle, 3,000 words, same rubric, same 20 marks. No student carries more than two: from a third, that course marks your viva out of 30 instead.

YOUR MARKS FROM THIS PROJECT

30 the project — a team mark of 20 from each course that marks your file, plus your own viva of 10, held in class in session 14
30 the mid-term
40 the final
The three quizzes are practice and carry no marks.

This replaces coursework, not classes.

What each course marks

CODE	COURSE	WHAT THIS COURSE MARKS — 20 MARKS
GMBC445	Social Media & Search Engine Marketing Afnan Khan	This course marks the paid and social half of the asset pack: audience and platform choice, campaign structure and tracking, the creative testing plan, budget control and pacing, and the honesty and clarity of the performance report. 20 marks, team.
GMCL441	Cyber Laws & Ethics Farhat Ullah	This course marks the clearance: the rights and consent register behind every asset, the accuracy of the legal reading, the privacy and disclosure decisions, and the quality of the written clearance note the client would have to rely on. 20 marks, team.
GMDC552	Digital Compositing Zeeshan Ali Khan	This course marks the compositing: the quality of the keys and the roto, the accuracy of the track, how convincingly elements sit in the plate under grain, light and lens, and whether the shots meet the written delivery specification. 20 marks, team.

CODE	COURSE	WHAT THIS COURSE MARKS — 20 MARKS
GMMG553	Motion Graphics Zeeshan Ali Khan	This course marks the motion: whether timing, easing and weight make the animation read, whether type stays legible at speed, how sound and picture sit together, and whether every asset meets the agreed delivery specification. 20 marks, team.
GMSE555	Search Engine Optimization Afnan Khan	This course marks the organic search side of the pack: the keyword and intent research, the site architecture and on-page work, the technical fixes and schema, the content published against real queries, and the measurement plan that shows what changed. 20 marks, team.

What to hand in

- **GMBC445 Social Media & Search Engine Marketing** — A hosted campaign landing page built with AI tools, live Meta and Google Ads campaigns with conversion tracking installed, and a measurement dashboard — all live by session 12, with AI declaration.
- **GMCL441 Cyber Laws & Ethics** — By session 12 the clearance note and the rights register are filed alongside the published asset pack — every asset traced to a licence, a release or an original source — together with AI declaration.
- **GMDC552 Digital Compositing** — By session 12 the finished composited shots are delivered into the client asset pack and published with the partner courses — graded, at specification, each with a shot breakdown, and filed with AI declaration.
- **GMMG553 Motion Graphics** — By session 12 the animated assets — idents, bumpers, lower thirds and social cut-downs — are rendered to specification and published in the client asset pack with the partner courses, filed with AI declaration.
- **GMSE555 Search Engine Optimization** — By session 12 the client's site or campaign page is live and indexed — built with AI tools and hosted — carrying the schema, the internal linking and a verified Search Console property, together with the audit report, the measurement plan and AI declaration.

How big the file is

The written file is **3,000 words for every member**, plus or minus ten per cent — 15,000 words for a team of five, 12,000 for four, 9,000 for three — plus the artefacts: the evidence or data log with its instrument, interview notes and consent log, any program with its tests, the pitch deck, the AI declaration and the draft-to-final revision log. In the venture and client lanes the live thing itself is the largest artefact. Each member owns one section of 3,000 words with their name on it, one artefact they built, and one part they can defend alone at viva. A lens note is 3,000 words on the same project. The full format is in "The Build Block File — required format" in the kit.

Digital Reach Lab

CLIENT LANE

continued

Dates

Session 4	28 Sep	Planning brief issued — twenty minutes of class: the brief, the Ideas Book and the format sheet. Teams locked since session 3. Choose the project, design the instrument or find the client, split the sections.
Guest session	Session 4, 5 or 6	A practitioner from outside the university speaks to your school, on whichever of those three sessions the speaker can make. Attendance is compulsory. Each student writes one page on it for their own file; it is not marked.
Session 7	19 Oct	One-page plan uploaded to the portal: the question, the instrument or the client charter, who owns what. Not marked — it is the gate. This week the convener merges the marking courses' requirements into the file's sections, so the team writes one document and not eight. Clients matched to teams.
Session 8	2 Nov	Build starts. Rubric issued, roles confirmed, team charter uploaded. Build-with-AI workshop for venture and client teams.
Session 9	9 Nov	Scope agreed with the convener. Client or subject confirmed. Your school arranges its industrial visit for some point between now and session 12.
Session 11	23 Nov	Draft review, inside a normal class: each course teacher sees the teams in their own section for about ten minutes each — show what exists, not what you plan. The convener samples three files per block.
Session 12	30 Nov	The artefact goes live or reaches its first complete state.
Session 13	7 Dec	Final file uploaded with its AI declaration. Venture teams evidence the first paying customer. Five of the twenty come off for each week the file is late, in every course marking it, and nothing is accepted after the Karachi Review.
Session 14	14-19 Dec	Vivas in class: each course holds its own, team by team, in its session-14 class — about three minutes per student, on your own part as that course sees it.
The Karachi Review	Tue 15 Dec	Your team exhibits at its own table, across the campus, all day. The day opens with a thirty-minute handover of studies to the public bodies who asked for them; press and industry attend. Ten panels — a teacher and an alumnus each — circulate the exhibition and score you at your table, about eight minutes a team. Not marked separately; the panel sheet goes to every course marking the file.
Weekend	—	Weekend cohorts hold all of the above in their Saturday and Sunday slots; the Karachi Review runs on a weekend afternoon.

CLIENT LANE

continued

What counts as done

A working deliverable in the client's hands, hosted where it needs to be hosted, with the files and accounts handed over and the client's written comment on record.

The client relationship

You get two meetings — one to take the brief, one to show progress — plus a short written comment at the end. Ask for no more. The client owes you nothing and pays nothing, and you may never request a fee.

Confidentiality

Whatever the client marks confidential stays inside the team and the supervisor. Never accept customer records, financial account details or personal data about identifiable people, and never put any of it into an AI tool.

If the client goes quiet

Tell your convener in the same week. Every client-lane block has an internal Greenwich brief as a fallback — the GX record, the alumni directory, Journey 40 and departmental systems all need building.

Marks

You are marked on the work, not on the client's mood. A difficult client, honestly handled and documented, is not a penalty.

Using AI

You are expected to use Claude and similar tools — to research, to build, to draft, to model numbers. Three rules. Check everything a tool gives you before you use it, and record the check. Declare what you used in the AI declaration bound into the file, as the HEC *Framework on the Use of Generative AI Tools* (2026) requires. Be able to explain, at the viva, everything your team built. **Work you cannot explain is not credited to you.** Undeclared use, or use to fabricate data, references or results, is academic misconduct. Never put real client, patient or examinee data, or anything identifying a real person, into a tool.
