

BUILD BLOCK BRIEF · FALL 2026-27

Enterprise & Money · Venture Launch VENTURE LANE

Planning brief session 4 · build from session 8 · 40 students · 8 teams · courses: GBEP564, GBSC552, GEFM443, GEFT446, GEMA553, GHSY551, GBOB555

What your team is building

A venture built and launched with real customers by session 12, self-funded or sponsored. Business model, supply chain, financial management, fintech rails, management accounts, a psychology-of-the-customer chapter; the venture file reports its findings to the authority that regulates the space.

WEEKEND TRACK

10 students in this block (2 teams) are taught only at the weekend. Their check-ins, guest session and Review slot run in weekend slots. No team mixes weekday and weekend students.

ONE PROJECT, SEVERAL GRADEBOOKS

You submit **one** piece of work, and each course that marks it looks at a different dimension, out of 20. **At most eight courses mark one team file.** A course you take that falls outside those eight sets you a **lens note** instead — an individual piece on the same project from that course's angle, 3,000 words, same rubric, same 20 marks. No student carries more than two: from a third, that course marks your viva out of 30 instead.

YOUR MARKS FROM THIS PROJECT

30 the project — a team mark of 20 from each course that marks your file, plus your own viva of 10, held in class in session 14
30 the mid-term
40 the final
 The three quizzes are practice and carry no marks.

This replaces coursework, not classes.

What each course marks

CODE	COURSE	WHAT THIS COURSE MARKS — 20 MARKS
GBEP564	Entrepreneurship Dr. Emad ul Karim	This course marks the opportunity and the launch: the evidence behind the gap, the business model and how its assumptions were tested, the quality of the offer that went live, what the market said back, and the honesty of the post-mortem. 20 marks, team.
GBSC552	Supply Chain Management Sohail Sultan	This course marks the supply side: how the supplier was chosen and on what terms, whether the inventory and delivery decisions were sized from evidence, the landed cost per unit including returns, and whether the fulfilment flow survived contact with real orders. 20 marks, team.
GEFM443	Financial Management Mohammad Ali Saeed	This course marks the money behind the venture: the unit economics and how they were derived, the pricing decision, the funding requirement and its sources, the twelve-month cash plan, and whether the model survives a change in its assumptions. 20 marks, team.

CODE	COURSE	WHAT THIS COURSE MARKS — 20 MARKS
GEFT446	Fintech Dr Muhammad Asif	This course marks the money movement: the payment rail chosen and why, the order-to-cash flow from first click to settled funds, the fees and settlement times costed, the regulatory position of the arrangement, and the fraud and data controls put in place. 20 marks, team.
GEMA553	Management Accounting Jawed Muslim	This course marks the cost side: the cost model behind the offer, fixed and variable costs separated and evidenced, the contribution and break-even volume, the budget set at session 9 and the variances against it, and the management accounts produced at the end. 20 marks, team.
GHSY551	Psychology Aisha Ismail	This course marks the behavioural evidence behind the venture: the interview and observation design, what participants actually said, how the offer uses attention, habit and social proof, and where the team drew the line between persuasion and manipulation. Consenting adult participants only; no clinical claims. 20 marks, team.
GB0B555	Organizational Behavior Uzma Khalid	This course marks the human side of the venture: how the team was structured and its decision rights written down, how motivation and conflict were handled when the pressure arrived, the quality of the observation evidence kept, and the honesty of the account of how the team worked. 20 marks, team.

What to hand in

- **GBEP564 Entrepreneurship** — A live offer by session 12 — a site, a WhatsApp catalogue, a Daraz or Instagram listing, whichever the market actually uses — built with AI tools and hosted; the one-page venture file; AI declaration.
- **GBSC552 Supply Chain Management** — A working order-to-delivery tracker built with AI tools and hosted — supplier file, stock position, packing and courier steps, returns and landed cost per unit — live by session 12 and running against real orders, with AI declaration.
- **GEFM443 Financial Management** — By session 12 a hosted cash and pricing model for the venture — built with AI assistance and published as a live dashboard the panel can open — together with the one-page funding case and AI declaration.
- **GEFT446 Fintech** — A working payment and order-to-cash setup for the venture — a live wallet or gateway, an order form or checkout built with AI tools and hosted, and the reconciliation sheet — in place by session 12 with AI declaration.

BUILD BLOCK BRIEF · FALL 2026-27

Enterprise & Money · Venture Launch VENTURE LANE

continued

- **GEMA553 Management Accounting** — A working management accounts pack for the venture — a hosted costing and budget model built with AI tools, with contribution, break-even, the monthly budget and variances against actuals — submitted in session 12 with AI declaration.
- **GHSY551 Psychology** — By session 12 the behavioural evidence pack filed with the live offer — consent forms, an interview and observation log from consenting adult participants, and the tested landing-page or catalogue copy built with AI tools and hosted with the venture team.
- **GBOB555 Organizational Behavior** — The venture's live offer, built with AI tools and hosted, together with a hosted team operating pack — charter, roles, decision rights, meeting record and the log of what was revised — submitted by session 12 with AI declaration.

How big the file is

The written file is **3,000 words for every member**, plus or minus ten per cent — 15,000 words for a team of five, 12,000 for four, 9,000 for three — plus the artefacts: the evidence or data log with its instrument, interview notes and consent log, any program with its tests, the pitch deck, the AI declaration and the draft-to-final revision log. In the venture and client lanes the live thing itself is the largest artefact. Each member owns one section of 3,000 words with their name on it, one artefact they built, and one part they can defend alone at viva. A lens note is 3,000 words on the same project. The full format is in "The Build Block File — required format" in the kit.

Dates

Session 4	28 Sep	Planning brief issued — twenty minutes of class: the brief, the Ideas Book and the format sheet. Teams locked since session 3. Choose the project, design the instrument or find the client, split the sections.
Guest session	Session 4, 5 or 6	A practitioner from outside the university speaks to your school, on whichever of those three sessions the speaker can make. Attendance is compulsory. Each student writes one page on it for their own file; it is not marked.
Session 7	19 Oct	One-page plan uploaded to the portal: the question, the instrument or the client charter, who owns what. Not marked — it is the gate. This week the convener merges the marking courses' requirements into the file's sections, so the team writes one document and not eight. Clients matched to teams.
Session 8	2 Nov	Build starts. Rubric issued, roles confirmed, team charter uploaded. Build-with-AI workshop for venture and client teams.
Session 9	9 Nov	Scope agreed with the convener. Client or subject confirmed. Your school arranges its industrial visit for some point between now and session 12.
Session 11	23 Nov	Draft review, inside a normal class: each course teacher sees the teams in their own section for about ten minutes each — show what exists, not what you plan. The convener samples three files per block.
Session 12	30 Nov	The artefact goes live or reaches its first complete state.
Session 13	7 Dec	Final file uploaded with its AI declaration. Venture teams evidence the first paying customer. Five of the twenty come off for each week the file is late, in every course marking it, and nothing is accepted after the Karachi Review.
Session 14	14-19 Dec	Vivas in class: each course holds its own, team by team, in its session-14 class — about three minutes per student, on your own part as that course sees it.
The Karachi Review	Tue 15 Dec	Your team exhibits at its own table, across the campus, all day. The day opens with a thirty-minute handover of studies to the public bodies who asked for them; press and industry attend. Ten panels — a teacher and an alumnus each — circulate the exhibition and score you at your table, about eight minutes a team. Not marked separately; the panel sheet goes to every course marking the file.
Weekend	—	Weekend cohorts hold all of the above in their Saturday and Sunday slots; the Karachi Review runs on a weekend afternoon.

Rules for this lane

BUILD BLOCK BRIEF · FALL 2026-27

Enterprise & Money · Venture Launch VENTURE LANE

continued

What counts as done

A live offer that a stranger could buy from, and at least one paying customer who is not a relative or a classmate, evidenced by a receipt or transaction record with the customer's identity removed.

Money

The University funds each venture team with Rs 25,000; how to draw it is announced by the Office of the Provost before Session 8. Every rupee in and out is accounted for, with receipts, in the venture file; unspent funds are returned. You may also raise sponsorship on top. The University is not a party to your venture and carries no liability for it.

Legal ground

No company is registered at this stage. You operate as a sole-proprietor offer, payments go through one team member's personal mobile wallet, and the University is not a party to your venture and carries no liability for it. You may not contract in the University's name.

Sign-off

Food, health, cosmetic and childcare offers need your course teacher's written approval before anything is offered for sale.

Marks

Your mark does not depend on how much you sell. It depends on the evidence behind the gap, the quality of what you built, what the market told you, and the honesty of your post-mortem. A venture that fails and is analysed well can earn full marks.

Using AI

You are expected to use Claude and similar tools — to research, to build, to draft, to model numbers. Three rules. Check everything a tool gives you before you use it, and record the check. Declare what you used in the AI declaration bound into the file, as the HEC *Framework on the Use of Generative AI Tools* (2026) requires. Be able to explain, at the viva, everything your team built. **Work you cannot explain is not credited to you.** Undeclared use, or use to fabricate data, references or results, is academic misconduct. Never put real client, patient or examinee data, or anything identifying a real person, into a tool.
