

BUILD BLOCK BRIEF · FALL 2026-27

sm Community Brief **CIVIC LANE**

Planning brief session 4 · build from session 8 · 23 students · 5 teams · courses: GD CD752, GD IS555, GD IT630, GH BY326, GH CP544, GH FL557, GH GS561, GH PN546, GH PP435, GH PS542, GH PS555

What your team is building

Education, language, linguistics, sustainability and literature courses with few shared students: each team runs a community-facing piece in its own subject to the same dates and standard.

WEEKEND TRACK

5 students in this block (1 team) are taught only at the weekend. Their check-ins, guest session and Review slot run in weekend slots. No team mixes weekday and weekend students.

ONE PROJECT, SEVERAL GRADEBOOKS

You submit **one** piece of work, and each course that marks it looks at a different dimension, out of 20. **At most eight courses mark one team file.** A course you take that falls outside those eight sets you a **lens note** instead — an individual piece on the same project from that course's angle, 3,000 words, same rubric, same 20 marks. No student carries more than two: from a third, that course marks your viva out of 30 instead.

YOUR MARKS FROM THIS PROJECT

30 the project — a team mark of 20 from each course that marks your file, plus your own viva of 10, held in class in session 14
30 the mid-term
40 the final
The three quizzes are practice and carry no marks.

This replaces coursework, not classes.

What each course marks

CODE	COURSE	WHAT THIS COURSE MARKS — 20 MARKS
GD CD752	Curriculum Development & Instructional Design To be assigned	This course marks the design work: the needs analysis carried out with the provider, the outcomes written and their alignment to assessment and instruction, the materials produced, the evaluation plan, and the justification offered for each decision. 20 marks, team.
GD IS555	Teaching of Islamic Studies (Content & Pedagogy) Zulaira Kemani	This course marks the content and the teaching in the community brief: the accuracy of the sources cited, the fit between the method and the age group, the fairness shown to differing views in the room, and the evidence that the pupils learned. 20 marks, team.
GD IT630	Information & Communication Technologies in Education Dr Muhammad Asif Khan	This course marks the technology and the pedagogy in the community brief: the fit between the tool chosen and the learning outcome, the accessibility and safeguarding decisions taken, the evidence that the resource was actually used, and the data read from it. 20 marks, team.

CODE	COURSE	WHAT THIS COURSE MARKS — 20 MARKS
GHBV326	Biology Affan Salman	This course marks the biological and health content of the field study: the physiological question asked, the accuracy of the mechanism described, the fit between the measure chosen and the claim made, and the honesty of the interpretation. 20 marks, team.
GHCP544	Classical Poetry Mohammad Yousha	This course marks the literary substance of the study: the accuracy with which poems and performances are identified and quoted, the analysis of form and meaning in what was collected, the handling of translation, and the quality of the written account. 20 marks, team.
GHFL557	Foreign Language - Turkish To be assigned	This course marks the Turkish inside the community brief: the accuracy and register of every word published, the fit between the phrasing and the situation it serves, and each student's ability to conduct and interpret a short spoken exchange. 20 marks, team.
GHGS561	Global Sustainability Dr Ambareen Atiq	This course marks the field study itself: the problem defined and bounded, the method and sampling, the evidence gathered at first hand, the analysis set against policy and scientific literature, and the feasibility of the recommendations put to the community. 20 marks, team.
GHPN546	Prose Non-Fiction To be assigned	This course marks the writing in the community brief: the reporting that stands behind it, the shape of the piece, the handling of quotation and evidence, the control of voice and register, and the quality of the revision between draft and final. 20 marks, team.
GHPP435	Phonetics & Phonology Amna Khan	This course marks the phonetic and phonological content of the study: the recording protocol and the sample, the accuracy and consistency of transcription, the analysis of variation against a described standard, and the honesty with which the speakers are represented. 20 marks, team.
GHPS542	Pragmatics & Semantics Amna Khan	This course marks the pragmatic analysis: the quality of the transcribed data, the identification of speech acts, implicature and face work within it, the treatment of code-switching, and the defensibility of the account given against the alternatives. 20 marks, team.

CODE	COURSE	WHAT THIS COURSE MARKS — 20 MARKS
GHPS555	Psycholinguistics & Sociolinguistics Sharmeen Ismail	This course marks the empirical work: the research question and its grounding in the literature, the design and the sampling, the treatment of participants and consent, the analysis and its statistics, and the honesty of the conclusions drawn from a small sample. 20 marks, team.

What to hand in

- **GD CD752 Curriculum Development & Instructional Design** — One course design per team — needs analysis, aligned outcomes and assessment, a teaching sequence with materials for at least three sessions, and an evaluation plan — delivered to the provider in session 12 with AI declaration.
- **GD IS555 Teaching of Islamic Studies (Content & Pedagogy)** — By session 13 the team files the unit of work taught in the partner school — the plans, the materials, the assessment and the pupil evidence — together with the field study report and AI declaration.
- **GD IT630 Information & Communication Technologies in Education** — By session 12 the technology-supported resource is live in the partner school — a hosted unit page or LMS module carrying video, a formative quiz and teacher notes, built with AI tools — with the field study and AI declaration.
- **GH BY326 Biology** — By session 13 the field study report is filed: the question, the method and the consent record, the data gathered in the community, the analysis, and the biological interpretation, together with AI declaration.
- **GH CP544 Classical Poetry** — One documented study per team — recordings and texts collected with consent, the analysis of the poetry in use, and a short public-facing anthology page for the community — submitted in session 12 with AI declaration.
- **GH FL557 Foreign Language - Turkish** — By session 13 the Turkish-language community resource is filed: a bilingual phrase set and notice for the partner organisation, a recorded interpreted exchange, and the field notes, together with AI declaration.
- **GH GS561 Global Sustainability** — One field-study report per team — problem statement, method, field evidence, analysis and costed recommendations, with a short public summary written for the community — submitted in session 12 with AI declaration.
- **GH PN546 Prose Non-Fiction** — By session 13 the team files a finished piece of reportage on the community subject — around two thousand words, edited, with source notes, consent records and any photographs used — together with AI declaration.
- **GH PP435 Phonetics & Phonology** — One study per team — the recorded corpus with consent forms, full IPA transcriptions, the analysis of variation, and a short accessible summary written for the speakers — submitted in session 12 with AI declaration.

BUILD BLOCK BRIEF · FALL 2026-27

sm Community Brief **CIVIC LANE**

continued

- **GHPS542 Pragmatics & Semantics** — One study per team — transcribed talk with consent forms, the annotated pragmatic analysis, and a short plain-language summary written for the speakers — submitted in session 12 with AI declaration.
- **GHPS555 Psycholinguistics & Sociolinguistics** — One study report per team — question, method, participants, data, analysis and limitations, with the anonymised data set and a plain-language summary for participants — submitted in session 12 with AI declaration.

How big the file is

The written file is **3,000 words for every member**, plus or minus ten per cent — 15,000 words for a team of five, 12,000 for four, 9,000 for three — plus the artefacts: the evidence or data log with its instrument, interview notes and consent log, any program with its tests, the pitch deck, the AI declaration and the draft-to-final revision log. In the venture and client lanes the live thing itself is the largest artefact. Each member owns one section of 3,000 words with their name on it, one artefact they built, and one part they can defend alone at viva. A lens note is 3,000 words on the same project. The full format is in "The Build Block File — required format" in the kit.

continued

Dates

Session 4	28 Sep	Planning brief issued — twenty minutes of class: the brief, the Ideas Book and the format sheet. Teams locked since session 3. Choose the project, design the instrument or find the client, split the sections.
Guest session	Session 4, 5 or 6	A practitioner from outside the university speaks to your school, on whichever of those three sessions the speaker can make. Attendance is compulsory. Each student writes one page on it for their own file; it is not marked.
Session 7	19 Oct	One-page plan uploaded to the portal: the question, the instrument or the client charter, who owns what. Not marked — it is the gate. This week the convener merges the marking courses' requirements into the file's sections, so the team writes one document and not eight. Clients matched to teams.
Session 8	2 Nov	Build starts. Rubric issued, roles confirmed, team charter uploaded. Build-with-AI workshop for venture and client teams.
Session 9	9 Nov	Scope agreed with the convener. Client or subject confirmed. Your school arranges its industrial visit for some point between now and session 12.
Session 11	23 Nov	Draft review, inside a normal class: each course teacher sees the teams in their own section for about ten minutes each — show what exists, not what you plan. The convener samples three files per block.
Session 12	30 Nov	The artefact goes live or reaches its first complete state.
Session 13	7 Dec	Final file uploaded with its AI declaration. Venture teams evidence the first paying customer. Five of the twenty come off for each week the file is late, in every course marking it, and nothing is accepted after the Karachi Review.
Session 14	14-19 Dec	Vivas in class: each course holds its own, team by team, in its session-14 class — about three minutes per student, on your own part as that course sees it.
The Karachi Review	Tue 15 Dec	Your team exhibits at its own table, across the campus, all day. The day opens with a thirty-minute handover of studies to the public bodies who asked for them; press and industry attend. Ten panels — a teacher and an alumnus each — circulate the exhibition and score you at your table, about eight minutes a team. Not marked separately; the panel sheet goes to every course marking the file.
Weekend	—	Weekend cohorts hold all of the above in their Saturday and Sunday slots; the Karachi Review runs on a weekend afternoon.

Rules for this lane

What counts as done

One documented file on a real problem, built on evidence you gathered yourself, with a recommendation you are prepared to defend.

People

Anyone you interview or survey is told who you are, what the work is for, and that they may decline. Names and identifying details are removed before anything is written up. No photographs of people without their spoken consent.

Honesty

Report what you found, including the parts that do not support your argument. Inventing or padding data is an integrity offence and is treated as one.

Safety

Work in pairs when collecting evidence, in daylight, in public places. No fieldwork in any location your convener has not agreed.

Marks

You are marked on the quality of the evidence and the reasoning, not on whether the problem gets solved.

Using AI

You are expected to use Claude and similar tools — to research, to build, to draft, to model numbers. Three rules. Check everything a tool gives you before you use it, and record the check. Declare what you used in the AI declaration bound into the file, as the HEC *Framework on the Use of Generative AI Tools* (2026) requires. Be able to explain, at the viva, everything your team built. **Work you cannot explain is not credited to you.** Undeclared use, or use to fabricate data, references or results, is academic misconduct. Never put real client, patient or examinee data, or anything identifying a real person, into a tool.
