

BUILD BLOCK BRIEF · FALL 2026-27

The Clinic STUDIO LANE

Planning brief session 4 · build from session 8 · 19 students · 4 teams · courses: GHAS544, GHBP541, GHDP545, GHPC543, GHPP542, GHPT546

What your team is building

A clinical-practice portfolio: assessment, formulation and intervention on a real population need, with developmental, biological, psychopharmacological and testing chapters; findings go to the health authority.

ONE PROJECT, SEVERAL GRADEBOOKS

You submit **one** piece of work, and each course that marks it looks at a different dimension, out of 20. **At most eight courses mark one team file.** A course you take that falls outside those eight sets you a **lens note** instead — an individual piece on the same project from that course's angle, 3,000 words, same rubric, same 20 marks. No student carries more than two: from a third, that course marks your viva out of 30 instead.

YOUR MARKS FROM THIS PROJECT

30 the project — a team mark of 20 from each course that marks your file, plus your own viva of 10, held in class in session 14
30 the mid-term
40 the final
 The three quizzes are practice and carry no marks.
 This replaces coursework, not classes.

What each course marks

CODE	COURSE	WHAT THIS COURSE MARKS — 20 MARKS
GHAS544	Advance Social Psychology Maria Tahir	This course marks the social and contextual section of the file: the family, group and community influences identified, the account of stigma and help-seeking, the theory used to explain them, and the evidence cited. Mock case material only; no clinical claim is made. 20 marks, team.
GHBP541	Biological Psychology Affan Salman	This course marks the neurobiological section of the file: the structures and pathways named, the accuracy of the mechanism proposed, the evidence cited for it, and the candour about what biology does not explain in this case. Mock case material only; no diagnosis. 20 marks, team.
GHDP545	Development Psychology Maria Tahir	This course marks the developmental section: the developmental history taken and organised, milestones read against evidence, life-stage tasks identified, and risk and protective factors traced across the case. Mock cases only; no child is interviewed by students. 20 marks, team.

CODE	COURSE	WHAT THIS COURSE MARKS — 20 MARKS
GHPC543	Psychopharmacology Maria Tahir	This course marks the pharmacological section of the file: the agents named and their mechanisms, the side effects and interactions identified, the trial evidence cited for the choice, and the questions the team would put to a prescriber. Mock case only; no student advises anyone on medication. 20 marks, team.
GHPP542	Psychopathology Syed Shaheer Jawaaid	This course marks the descriptive psychopathology and the formulation: symptoms recorded accurately, criteria applied correctly against DSM-5-TR and ICD-11, differentials considered, and description kept separate from inference. Mock cases only; no diagnosis is issued. 20 marks, team.
GHPT546	Psychological Testing To be assigned	This course marks the assessment section of the file: the battery selected and the reason for it, correct scoring of the practice protocols, an interpretation written with confidence intervals and stated limits, and the handling of consent and test security. Mock case material only; no diagnosis. 20 marks, team.

What to hand in

- **GHAS544 Advance Social Psychology** — By session 12 the social and contextual section of the Clinic portfolio — a stigma and help-seeking analysis, a family and group influence map, and a short appraisal of the literature behind both — filed with the team file and AI declaration.
- **GHBP541 Biological Psychology** — By session 12 the neurobiological section of the Clinic portfolio — a one-page mechanism map, a two-page account with sources, and a stated-limits paragraph — submitted with the team file and AI declaration. Mock material only.
- **GHDP545 Development Psychology** — One shared Clinic file per team by session 13, carrying this course's section — a full developmental history, milestone review, life-stage analysis and risk-and-protective-factor map — plus AI declaration.
- **GHPC543 Psychopharmacology** — By session 12 the pharmacological section of the Clinic portfolio — a class and mechanism table, a side-effect and interaction note, an appraisal of one trial, and the prescriber questions — filed with the team file and AI declaration.
- **GHPP542 Psychopathology** — One shared Clinic file per team by session 13, carrying this course's section — presenting problem, mental state description, criteria worked against two manuals, differentials and a written formulation — plus AI declaration.

BUILD BLOCK BRIEF · FALL 2026-27

The Clinic STUDIO LANE

continued

- **GHPT546 Psychological Testing** — By session 12 the assessment section of the Clinic portfolio — the battery rationale, scored practice protocols, a score summary with confidence intervals, and a written interpretation with its limits — submitted with the team file and AI declaration.

How big the file is

The written file is **3,000 words for every member**, plus or minus ten per cent — 15,000 words for a team of five, 12,000 for four, 9,000 for three — plus the artefacts: the evidence or data log with its instrument, interview notes and consent log, any program with its tests, the pitch deck, the AI declaration and the draft-to-final revision log. In the venture and client lanes the live thing itself is the largest artefact. Each member owns one section of 3,000 words with their name on it, one artefact they built, and one part they can defend alone at viva. A lens note is 3,000 words on the same project. The full format is in "The Build Block File — required format" in the kit.

Dates

Session 4	28 Sep	Planning brief issued — twenty minutes of class: the brief, the Ideas Book and the format sheet. Teams locked since session 3. Choose the project, design the instrument or find the client, split the sections.
Guest session	Session 4, 5 or 6	A practitioner from outside the university speaks to your school, on whichever of those three sessions the speaker can make. Attendance is compulsory. Each student writes one page on it for their own file; it is not marked.
Session 7	19 Oct	One-page plan uploaded to the portal: the question, the instrument or the client charter, who owns what. Not marked — it is the gate. This week the convener merges the marking courses' requirements into the file's sections, so the team writes one document and not eight. Clients matched to teams.
Session 8	2 Nov	Build starts. Rubric issued, roles confirmed, team charter uploaded. Build-with-AI workshop for venture and client teams.
Session 9	9 Nov	Scope agreed with the convener. Client or subject confirmed. Your school arranges its industrial visit for some point between now and session 12.
Session 11	23 Nov	Draft review, inside a normal class: each course teacher sees the teams in their own section for about ten minutes each — show what exists, not what you plan. The convener samples three files per block.
Session 12	30 Nov	The artefact goes live or reaches its first complete state.
Session 13	7 Dec	Final file uploaded with its AI declaration. Venture teams evidence the first paying customer. Five of the twenty come off for each week the file is late, in every course marking it, and nothing is accepted after the Karachi Review.
Session 14	14-19 Dec	Vivas in class: each course holds its own, team by team, in its session-14 class — about three minutes per student, on your own part as that course sees it.
The Karachi Review	Tue 15 Dec	Your team exhibits at its own table, across the campus, all day. The day opens with a thirty-minute handover of studies to the public bodies who asked for them; press and industry attend. Ten panels — a teacher and an alumnus each — circulate the exhibition and score you at your table, about eight minutes a team. Not marked separately; the panel sheet goes to every course marking the file.
Weekend	—	Weekend cohorts hold all of the above in their Saturday and Sunday slots; the Karachi Review runs on a weekend afternoon.

What counts as done

A finished piece of work — not a plan for one, not a prototype that only runs on your machine — with the process behind it documented.

Craft

The standard is what a competent professional would accept, at the level of your year. Unfinished work presented as finished is marked as unfinished.

Sources and rights

Anything you did not make yourself is credited. You may not use material you have no right to use, and asset licences are recorded in the file.

If your work involves people

Consenting adults only, with an information sheet, a consent form and a debrief. Mock cases where the subject is clinical. No real patient, client or examinee material, ever, and none of it into an AI tool.

Marks

Craft carries the weight, but the reasoning behind your choices carries the rest. Be able to say why you did it that way.

Using AI

You are expected to use Claude and similar tools — to research, to build, to draft, to model numbers. Three rules. Check everything a tool gives you before you use it, and record the check. Declare what you used in the AI declaration bound into the file, as the HEC *Framework on the Use of Generative AI Tools* (2026) requires. Be able to explain, at the viva, everything your team built. **Work you cannot explain is not credited to you.** Undeclared use, or use to fabricate data, references or results, is academic misconduct. Never put real client, patient or examinee data, or anything identifying a real person, into a tool.
