

Your handbook · Set B

What you are doing this term, how you will be marked, and where to get help · revised 19 September 2026

This term you do one real piece of work instead of fifteen small ones.

Until now, every course you took set its own assignments. Six courses meant many small pieces, none of them worth keeping, all of them due in the same fortnight. From this term, you and up to four others take **one real problem in Karachi** and produce **one substantial piece of work** about it. Every ordinary course you take marks that same piece of work — each from its own angle.

01 The three words you need

Greenwich Works

The programme. Every undergraduate in the university is in it, including you.

Your Build Block

The group of courses that share your timetable. Your project comes from your block, and your block's courses mark it.

The Folio

The thing your team produces. One file, built between October and December, plus whatever your project needs — data, drawings, code, a working product.

This handbook is for undergraduates. Masters, MPhil, PhD and B.Ed students are not placed in teams. Their teachers explain how their term works.

02 Honestly, what changes for you

BEFORE	FROM THIS TERM
Three assignments per course	The project is the coursework. Three short quizzes show you where you stand — they carry no marks.
Assignments nobody reads twice	One piece of work that goes to a government body, a client or an organisation that asked for it.
Working alone	A team of up to five. You are marked as a team on the work, and on your own on whether you can explain your part.
Nobody sees your work	You show it at the Karachi Review on Tuesday 15 December . A panel that includes someone from outside the university scores it at your table.

Your exams are still your teacher's. The mid-term and the final are set and marked by your own teacher, as before. What has changed is the coursework around them, and the weights: every course is now project 30 · mid-term 30 · final 40. **You also take at least one project course — a different way to study a subject: one-to-one with its teacher, a piece of real work that is yours, and a defence before a panel.** Pages 8 and 9 explain it.

03 Every course is out of 100. Here is where the marks come from.

30

THE PROJECT

30

YOUR MID-TERM

40

YOUR FINAL

20

The team mark. What your team's Folio is worth in *this* course: substance 8 · evidence 4 · integration 3 · presentation 3 · revision 2.

10

Your viva. Three minutes, alone, in class in Session 14. Your mark, nobody else's.

0

The quizzes. Three short ones, in Sessions 3, 6 and 11. They still happen, but they carry no marks.

Most of your courses meet every week and mark your team's Folio. So the same Folio earns you a mark in each of them. If you take six, that one piece of work is marked six ways — the finance course looks at your numbers, the writing course at your argument, the law course at your contracts. If only one or two of your team take a course, that course marks your own named sections of the Folio.

In some practical courses — design, media, computing — the final may be a practical project, a production or a portfolio instead of a written paper. Your teacher will tell you.

The part people miss. Ten of those thirty are **yours alone**. In Session 14 your teacher asks you, on your own, about your part of the work. If you cannot explain something handed in under your name, you do not get credit for it — however good it is. This is not a trick. It is the reason a team mark is fair.

04 What if one of my courses is not marking my team's project?

At most **eight** courses mark one team's Folio. If you take an ordinary course outside those eight, that course sets you a **lens note** — a piece you write on your own, about the same project, from that course's angle. It carries the Folio's 20, on the same rubric; your viva 10 stays.

You never write more than two lens notes. If a third course falls outside the eight, you do not write a third piece. That course sets no written piece and marks your **viva out of 30**. The same goes for a fourth, and so on.

You will be told which is which. Your team's marking list comes with your team, at Session 3. It says which courses mark the Folio, where a course marks your sections alone, and where you owe a lens note. If it looks wrong, tell your convener that week — not in November.

05 What happens, and when		THE DATES THAT MATTER
SESSION	WHAT HAPPENS	WHAT YOU DO
Session 3 21–26 Sep	Your team is confirmed	Teams are cut once, on Tuesday 22 September. You are told your team, your block, and which courses mark your Folio. Teams lock this week — after this, a change needs a written reason from your convener.
Session 4 28 Sep–3 Oct	You choose your project	Twenty minutes of class. You get the brief and the Ideas Book, and your team picks a project. Your convener approves it.
Sessions 4, 5 or 6	A guest comes in	Someone who does this for a living talks to your school. Compulsory. You write one page about it for your own file — it is not marked.
Session 7 19–24 Oct	Your plan is due	One page to your convener: what you are doing, who is doing what, and what you need.
Session 8 2–7 Nov	The build starts	You get the rubric — the exact sheet your teachers mark you against. Your team charter is due.
Sessions 9–12	You do the work	Fieldwork, building, writing. One industrial visit with your school somewhere in here.
Session 12 30 Nov–5 Dec	It goes live	Whatever you made has to exist by now — the product, the campaign, the report, the offer.
Session 13 7–12 Dec	The Folio is due	Uploaded with your AI declaration. Five of the twenty off for every week it is late — the team mark, in every course marking it. Nothing accepted after the Karachi Review.
Session 14 14–19 Dec	Your viva	Three minutes with each teacher, in class, about your own part. In a big class the vivas may start a week early. Your teacher will tell you.
Tue 15 Dec	The Karachi Review	Your team shows its work, all day, across the campus. A teacher and an alumnus come to your table and score you there. The day opens with students handing their studies to public bodies. Compulsory.

06 How big is the Folio, really?
3,000 words for each person in your team, plus or minus ten per cent — so 15,000 for a team of five, 12,000 for four, 9,000 for three. Plus the artefacts: the data, the drawings, the code, the product, whatever your project produces. That is about the writing you used to do across all your assignments — except it is one thing, and it is worth keeping.

07 Your week
● New this term? If this is your first semester, all your classes are on weekdays and none is after 6 pm. ● Tuesday is a teaching day. Classes run on Tuesday morning and afternoon, like any other weekday. ● Registering late? If you register after 21 September, you are placed in a team by 3 October.

08 Your team does not invent a question. It takes a patch of one.

There are about **135 questions** in the Ideas Book and about **211 teams** in the university. That is deliberate: several teams share a question, and **no two teams share a patch of it**.

The question

Comes from the Ideas Book, written with a real body that wants an answer. You do not have to think it up, and you will not be the only team on it.

The patch

Your slice of it — a street, a market, a ward, a scheme, a month, a kind of user. You choose it, you type it into the portal, and it is yours. Nobody else can claim the same one.

First to type it, gets it. The portal refuses a patch another team has already taken on the same question, and tells you on the spot. So come to Session 4 with two patches in mind, not one.

09 What a patch looks like

THE SHARED QUESTION

FOUR PATCHES, FOUR TEAMS

Why do water tankers cost what they cost?

Gulshan Block 13 · Korangi Sector 33 · Lyari, Baghdadi · the Landhi industrial belt

What happens to a small retailer under the new sales-tax regime?

Bolton Market cloth · Tariq Road garments · Saddar mobile phones · Empress Market food

Who actually uses the BRT, and for what?

Red Line, Numaish–Gurumandir · morning peak · women passengers · the last mile at each end

Five tests your patch has to pass. It is small enough to finish by December · you can get to it · someone there will talk to you · there is something to count, measure or collect · and you can say in one sentence who is better off if you get it right.

10 First-year teams, and venture teams

In your first year?

Your team works for a real client inside the university — a Greenwich office or department with a job that needs doing. One client may work with three or four teams.

In a venture team?

You build a small business offer. The University gives each venture team Rs 25,000 to start, drawn on terms the Office of the Provost announces before Session 8. Keep every receipt.

11 If nothing in the book fits

You may bring your own question, on two conditions: a named organisation wants the answer, and your convener signs it off **at Session 4**, not later.

What gets refused. A question that is really a literature review · a survey of students on campus · anything that needs money your block cannot give · anything where the honest answer is already published. Your convener will say so on the day and give you a replacement the same week.

12 Getting into the portal

- 1 **You get a claim slip once teams are cut.** It has your name, your roll number and a one-time code. It is yours; it works once.
- 2 **Go to the portal and enter your roll number and the code.** Then set your own password. That is the whole sign-up.
- 3 **Lost the slip?** Your convener can have it reissued. Nobody can use it after you have claimed it.
- 4 **What lives there:** your team, your block, the courses marking your Folio, your project and patch, every hand-in and its deadline, the Provost's booking diary, the private route to report a teammate, and your marks.

Every hand-in goes through the portal. Not email, not WhatsApp, not a USB. If it is not on the portal at the deadline, it is late.

13 Before you go out and talk to anyone

Most projects need you to leave the campus. Ten questions decide whether your fieldwork needs permission — your convener goes through them with you at Session 7.

WHICH ROUTE	WHAT IT MEANS
Convener sign-off	Most teams. Public places, adults, nothing private recorded, nobody named. Your convener signs the plan and you go.
Panel review	You will ask people about anything private, record anything that identifies a person, or enter a workplace where someone could be hurt. A panel of three looks at it within a week.
Not this term	Anyone under eighteen without their guardian, patients, prisoners, anyone who would be at risk if identified. Change the patch instead.

Consent is not a formality. Everyone you speak to hears the consent sheet read aloud, in English or Urdu. They can stop at any point and their answers come out. No recording without consent in writing.

14 The rules for being out there

- **Not before the go-ahead.** Fieldwork starts only when the duty phone and the sign-out sheet are in place. Your convener tells you when.
- **Never alone.** Two students minimum, always. No fieldwork after sunset without written permission.
- **Somebody knows where you are.** Your plan says where and when. If it changes, the portal says so before you go.
- **Carry the letter and your card.** Your team letter, your student card, and the duty number.
- **No money changes hands.** Not to a respondent, not for access. If someone asks, leave and report it.
- **Leave when you feel you should.** No mark is worth an argument on a street. Walking away is never held against you.
- **Report it the same day.** Anything that went wrong — a refusal, a row, an injury, anything — goes to your convener that day, not into the Folio in December.

If someone is hurt. Get them care first. Never delay treatment. Ring the duty number, and tell your convener the same day.

15 Your team

- 1 **You did not choose them, and that is deliberate.** Teams are cut from students who share most of a timetable, so that the same courses can mark the same work. You will work with people you did not pick — which is what happens after you graduate.
- 2 **Write the charter in Session 8.** Who does what, by when, and what happens if someone does not. It is one page, and it is the thing you point at later.
- 3 **Your teacher can move you up or down three marks** from the team mark, on the evidence of your viva and the charter. Carrying the team is noticed. So is not doing your part.
- 4 **If someone is not doing their share, report it early.** There is a private route in the portal. Use it in October, not in December — in December nobody can fix it.

16 Using AI — read this properly

You are expected to use it. Claude, ChatGPT, Gemini — use them to research, to draft, to check your work, to argue with. The work you produce should be better because these tools exist.

Three rules, and they are not negotiable:

- **Declare it.** Every hand-in carries an AI declaration: which tools, what for, how you checked, and what is your own. This is the HEC requirement, not a Greenwich invention.
- **Check it.** Anything a tool gives you is checked before it goes in. Invented references and invented data are misconduct — and they are easy to spot.
- **Be able to explain it.** At the viva you will be asked about your own work. Anything you cannot explain is not credited to you. A tool cannot sit the viva for you.

Where students get caught. Not for using AI — for handing in something they never read. If a paragraph is in your Folio, you should be able to say why it is there and what it is based on. If you cannot, take it out.

17 Fifteen minutes with the Provost

SESSIONS 4 TO 13

Dr Naveed Ahmed Mughal, the Pro Vice Chancellor, is on campus **12:00 to 20:00, seven days a week**, from Session 4 until the Folio is due, to work with you on this.

HOW IT WORKS	WHAT YOU NEED TO KNOW
Book in the portal	At least one day ahead. Fifteen minutes.
As a team or on your own	Both are fine. Bring the problem you are actually stuck on.
Every team gets two	One after you choose your project, one during the build. They appear in your team's diary; you do not book them.
Other slots are first come	There are enough for most students, not for everyone twice. Book when you need it, not to hold a place.
Say what is stuck	One sentence when you book. Then the fifteen minutes start with your problem.

What this is for. Getting unstuck — a project that will not come together, a team that is not working, evidence you cannot get, an office that will not reply. It is not for marks; nobody in this meeting marks you.

18 Everyone else you can ask

Your course teacher

What *their* course wants from the Folio, and their own quizzes, mid-term and final. They give your marks.

Your convener

Named on your block brief. Approves your project, settles team problems, and decides when a course and a team disagree.

The portal

Everything in this handbook, plus your team, your dates, your hand-ins, your marks and the booking diary. It opens the week after the team cut.

Report a teammate

A private route in the portal for when someone is not doing their share. Answered within five working days.

One last thing. This is the first term Greenwich has worked this way. Some of it will not work first time. When that happens we would rather hear it from you in October than read it in a survey in January. Tell your convener, or book fifteen minutes and tell the Provost.

One or more of your courses is a project course. You study it one-to-one, make something real, and defend it before a panel.

19 What a project course is

How it works

No weekly lecture. You work one-to-one with the course's own teacher, on the project floor and in logged meetings. You produce a piece of real work that is yours, and you defend it aloud before a panel — which is how postgraduate and professional work is judged. **It does not mark your team's Folio.**

What you gain

A finished piece of your own for your portfolio or CV · regular one-to-one time with a teacher · practice defending your work out loud · depth in one real question instead of a little of everything.

It asks more of you. Nobody sets you a weekly reading. You plan your own work, keep your meetings, and answer for every choice at the defence. Students who do that well leave with something most classes cannot give them.

You still have a team. Your ordinary courses mark its Folio as usual. If every course you hold is a project course, you are still placed in a team, with classmates from your own batch, and you still help write its Folio.

20 How a project course is marked — 30 · 30 · 40

30

YOUR PROJECT

30

MID-TERM

40

THE FINAL — YOUR DEFENCE

30

The project. A piece you write on your own: your Build Block topic, seen through this subject. Marked by your supervisor.

30

The mid-term. Your teacher chooses: a written paper in mid-term week, or your Session 8 plan with your first 1,500 words. The course outline says which.

40

The defence. One hour, spoken, before a panel, in the examination fortnight. This is your final examination.

There is no separate viva in a project course — the defence is where you explain your work. It is marked out of 40: **command of the subject 15 · defends the choices 10 · answers the unexpected 10 · presents clearly 5.**

One piece, and it must contain real work. Your project is **6,000 words** and must include something you made or found yourself: data you collected, a thing you built, a case you investigated, or something handed to a real organisation. A reading-only essay does not pass. If you hold several project courses, you write **one** piece — 6,000 words plus 1,500 for each extra course, never more than 10,000 — and each course marks it from its own angle.

21 Where you meet — the project floor

YOUR PROGRAMME	PROJECT FLOOR
First semester	Tuesday daytime, 10 am–1 pm or 2–5 pm; your supervisor tells you which, and the room. Never after 6 pm.
Weekday programme, after the first semester	Tuesday, 6 pm to 9 pm.
Weekend programme	Sunday 9 am to 12 pm, Sunday 2 pm to 5 pm, or Saturday 2 pm to 5 pm. Your slot is on your timetable.

Supervision. The project floor each week, plus four logged one-to-ones with your supervisor, at Sessions 5, 8, 10 and 12. You both sign the log. Your supervisor is the teacher timetabled for that course.

22 The defence — your final examination

MINUTES	WHAT HAPPENS
0–20	You present your work. Every project course you hold is on the panel or has sent written questions.
20–50	Questions — about your work and about the subject. The examiners ask from the topic list on each course outline, because this is a final examination of the course, not only of the project.
50–60	You wait outside. The panel agrees each course's mark out of 40. You are told the result the same day.

Who sits. Two academics who score: a chair named by the Dean, and one from another school. An alumnus may sit as a third member who asks questions but does not score. **You sit one defence**, however many project courses you hold; each course marks its own 40.

23 What you must do to sit it

WHEN	WHAT IT MEANS FOR YOU
All term	Attend 80% of your project-floor sessions and keep your supervision log signed. Miss two of the four one-to-ones and you cannot sit the defence.
Session 4	Your topic is agreed: your team's Build Block topic, seen through this subject.
Session 13	The project is due, with your AI declaration. Five of the 30 off for every week it is late. Nothing accepted after 15 December.
From 21 Dec	The examination fortnight. You are told the day and hour of your defence in Session 12.
If you fail	The University's ordinary resit regulations apply, as for any other course.

24 Who to ask

Your supervisor

The course's own timetabled teacher. Runs your project floor, holds your one-to-ones, and marks your mid-term and your project.

Your convener

For your team and its Folio, and for the topic your project is built on.

The front desk

Ground floor. If a course is listed as a project course and you think it is wrong, say so at Session 3.
